

all about monkeys apes pdf

MONKEY FACT SHEET Monkeys are a large and varied group of mammals of the primate order. The term monkey includes all primates that do not belong to the categories human, ape, or prosimian; however, monkeys do have certain common features. All are excellent climbers, and most are primarily arboreal. Nearly

MONKEY FACT SHEET - World Animal Foundation

Monkeys also have their own unique set of fingerprints just like humans do. This is very interesting and further shows us that we are indeed highly related to all types of primates out there. Monkeys have a brain that is large for their size and it is part of the reason why they are so intelligent.

Monkey Facts and Information

Many people call all primates monkeys, when in fact apes and monkeys are two kinds of animals under the classification of primate. They may look similar, but when you start to learn more about them, it becomes apparent there are many differences between monkeys and apes.

Monkeys and Apes: Pictures, Types, History and Facts

Monkeys are divided into two subgroups: Old World monkeys that can be found and live in Asian and Africa and New World Monkeys that are in South America. Apes are not considered to be monkeys, although monkeys and apes are considered to share the simian primate group.

Monkey Facts for Kids

Apes do not have tails, while most monkeys do, and apes are typically larger than monkeys, ... Chimpanzees are the most social of all the apes, and live in communities with 15 to 120 individuals.

Facts About Apes - Live Science

All about Apes: An adult male is up to 6 times stronger than a human adult male. Apes are omnivores, just like many of us. They eat mostly fruits and plants, but they occasionally snack on insects.

Ape Fun Facts for Kids

Colloquially, the terms "monkey" and "ape" are widely used interchangeably. ... The smallest accepted taxon which contains all the monkeys is the infraorder Simiiformes, or simians. However this also contains the hominoids (apes and humans), so that monkeys are, in terms of currently recognized taxa, non-hominoid simians. ...

Monkey - Wikipedia

Apes are way larger than monkeys and unlike monkeys they do not have tails. The most significant difference between apes and monkeys is that apes are far more intelligent than monkeys. These four types of apes are under a threat of extinction as their population has been decreased sharply because of the destruction of their natural habitats.
