Cornell Controlled Environment Agriculture

A large fraction of the waste stream is comprised of organic residuals that can be turned from a waste into a useful soil amendment through composting. CWMI addresses a broad range of residuals including manure, yard and food wastes, and mortalities and a wide array of audiences including households, schools, farms, municipalities and private entities.

Composting - Cornell Waste Management Institute

Biological systems engineering or biosystems engineering is a broad-based engineering discipline with particular emphasis on biology and chemistry. It can be thought of as a subset of the broader notion of biological engineering or bio-technology though not in the respects that pertain to biomedical engineering as biosystems engineering tends to focus less on medical applications than on ...

The FARM Environmental Stewardship module provides a comprehensive estimate of the greenhouse gas (GHG) emissions and energy use associated with dairy farming. The tool is based on a life cycle assessment (LCA) of fluid milk conducted by the Applied Sustainability Center at the University of Arkansas, incorporating data from more than 500 dairy farms across the United States.
