

## **modelling enterprise architectures pdf**

Enterprise modelling is the abstract representation, description and definition of the structure, processes, information and resources of an identifiable business, government body, or other large organization.. It deals with the process of understanding an organization and improving its performance through creation and analysis of enterprise models.

Good post Tom. My point of view is that hierarchical layering is a valuable technique for decomposing systems using abstraction based (top-down) models, and the number of layers that are required are based on the number abstractions required.

## **On layers in enterprise-architecture – Tom Graves / Tetradian**

The architectural style and principles. The architecture style defining a SOA describes a set of patterns and guidelines for creating loosely coupled, business-aligned services that, because of the separation of concerns between description, implementation, and binding, provide unprecedented flexibility in responsiveness to new business threats and opportunities.
