DIY projects to save energy, money and greenhouse gas emissions through: insulating, weatherizing, window treatments, efficient appliances, efficient lighting, and many more innovative and cost effective schemes.. I've include all of the basic "change your light bulbs" type areas, but have also included many off the beaten path ideas that appear to be practical and effective, but not well known.

### **Home Energy Conservation**

China is building at least one new coal-fired power plant every week and has a seemingly limitless appetite for coal.The Powder River Basin in southeast Montana and northeast Wyoming has a seemingly limitless supply.. There is increasing interest linking this supply with Asian demand through west coast coal terminals.

The environmental impact of paper is significant, which has led to changes in industry and behaviour at both business and personal levels. With the use of modern technology such as the printing press and the highly mechanized harvesting of wood, disposable paper became a relatively cheap commodity, which led to a high level of consumption and waste.The rise in global environmental issues such ...

\* Two common measures of energy are British thermal units (Btu) and joules. All forms of energy can be expressed in these units. One Btu is the amount of energy needed to raise the temperature of one pound of water from 39 to 40 degrees Fahrenheit. One joule is the amount of energy needed to lift one hundred grams (3.5 ounces) upward by one meter (3.3 feet) while on the surface of the earth.
