

thesis genetic engineering pdf

Genetic programming (GP) is an automated method for creating a working computer program from a high-level problem statement of a problem. Genetic programming starts from a high-level statement of "what needs to be done" and automatically creates a computer program to solve the problem.

genetic-programming.org-Home-Page

In artificial intelligence, genetic programming (GP) is a technique whereby computer programs are encoded as a set of genes that are then modified (evolved) using an evolutionary algorithm (often a genetic algorithm, "GA") " it is an application of (for example) genetic algorithms where the space of solutions consists of computer programs. The results are computer programs that are able to ...
